Oh No, Not Again! Rosh Hashana and Yom Kippur, Part 1

Community Scholar Program Presentation

Every year they come around, and every year we (most of us) go to synagogue - and every year it's the same old same old stuff. Haven't we heard it all before? Is there anything new left to say? In this mini-series, Clive makes a bold offer. He guarantees to provide you with at least three things you've never thought of before relating to the 'Days of Awe', the ideas behind them, the liturgy for the days, the idea of the cycle of the days and a host of other aspects. Can he do it? Join us and find out!

Honored by the Queen in 2016 for services to 'Education and the Jewish community', voted no 18 in the UK's Jewish

'Power 100' list and awarded the Max Fisher International Prize for Jewish Education by the Jewish Agency in Jerusalem, and CSP's 11th Annual One Month Scholar in January 2012, Clive Lawton is CEO of the Commonwealth Jewish Council. He was co-founder of Limmud, the internationally renowned Jewish adult education movement and worked for it till 2016. He has been a High school principal, Director of Education for the City of Liverpool, a governor of the Metropolitan Police, Chair of a Hospital Trust, a patron of the Jewish AIDS Trust, on the Editorial Board of Jewish Renaissance and more. He is currently a magistrate on the Bristol Bench, an independent Tribunal Chair for the National Health Service in the UK and lectures on the faculties of the European Centre for Leadership Training and the London School of Jewish Studies.

The Big Burn

AMERICAN EXPERIENCE | PBS

(replay from last week upon request)

Inspired by Timothy Egan's best-selling book, THE BIG BURN is the dramatic story of the massive wildfire that swept across the Northern Rockies in the summer of 1910.

In the spring of 1905, the first group of fresh-faced graduates of Yale's Forestry School began to arrive in the bawdy frontier towns of the West. These first employees of the Forest Service were given the monumental task of managing the newly created national forests in the Northern Rockies. Nothing could have prepared them for the severity of the drought there in 1910. Fires broke out continually and were fought by the rookie rangers as best they could. In mid-August, the particularly destructive fire season hit its peak: in just 36 hours, a firestorm burned more than three million acres and killed at least 78 firefighters, confronting the fledgling U.S. Forest Service with a catastrophe that would define the agency and the nation's fire policy for much of the twentieth century.

As America tries to manage its fire-prone landscapes in the twenty-first century, THE BIG BURN provides a cautionary tale of heroism and sacrifice, arrogance and greed, hubris and, ultimately, humility, in the face of nature's frightening power.

Krakatoa - The Great Volcanic Eruption

Docudrama about the gripping story and events

leading up to the cataclysmic eruption of the volcano Krakatoa in 1883.

On 27th August 1883 the uninhabited island of Krakatoa blew itself out of existence with an explosion the equivalent power of 150 million tons of TNT. The eruption was so loud that the sound was heard over a twelfth of the Earth's surface, the shockwaves reverberated around the entire planet, seven times. This explosion also caused giant tsunamis, the largest of them twice the height of those of 2004. These enormous waves wiped out 165 Indonesian towns and villages killing over 36,000 people. Within hours news of the disaster was transmitted around the globe, and scientists of the time struggled to comprehend the geological forces that caused the tragedy.

Indonesia has so many volcanoes and earthquakes because of its geographical position. The archipelago that starts in Northern Sumatra stretches over 3,000 miles south. It has been created by the forces where two of the tectonic plates that make up the Earth's surface, meet. The ocean floor of the Indo-Australian Plate and the Asian landmass of the Burma Plate are in collision. As they push against each other the heavier ocean floor is forced underneath the lighter continental rock. Krakatoa lies directly above this subduction zone.

This film reconstructs the true stories of survivors from their accounts and diaries, to piece together what happened in the months leading up to the most famous eruption of all time.
